A guide of frequently asked questions is presented to guide the indications to be given to user, which will be updated whenever necessary.

1. FAQs

1.1. Is the user not registered in the SNS? Can I proceed with the assessment?

It will not do assessment, but must create a file and forward it:

- Without symptoms (Transfer key = "Screening");
- With symptoms (Transfer key = "Screening");
- With non-COVID symptoms (Transfer key = "Senior").

If the user to whom the evaluation refers is absent, we can do the assessment?

We cannot assess an absent patient, so we should ask them to contact us later.
You can select the user "Anonymous" and end with Others/Absent User.

1.3. If the user wants data from the institution of registration or another one like Can I give this information?

You must transfer the call to the administrative service and end the call in 'Others' - Transfer to administrative service.

I have more than one person at home in the same situation, can I triage more than one per call?

Yes. At the end of the algorithm, a new call can be created and a process started for each user.

I have a clinical question, how can I clarify it at the moment of call?

Put the user on hold and contact the Call Center at the number 300 029 430.

1.6. User wants to know who justifies absences from work?

If the issue is related to the DPI, it is through the screening carried out by SNS 24. If it is related to another reason you should contact your family doctor.

1.7. User wants to take a test and questions about it?

The test is only triggered after evaluation, based on specific criteria.

1.8. User is already in isolation and has questions about days of isolation who will have to comply and who gives you that indication?

Isolation days are communicated after screening and the 7 days must always be adhered to.

Isolation dates to consider:

a. Date of onset of symptoms.

Example:

User started symptoms on 01/08/2022 and took PCR/TRAg on 01/11/2022 with positive result. The date to consider after validating the symptoms should be 08/01/2022

User starts symptoms, does PCR/TRAg and tests negative. Must complete the 7 days of isolation starting from the onset of symptoms.

1.9. User took a test and it was inconclusive (Self-test, PCR, and TRAg), the What should be done?

To choose, to take on the issue of the algorithm 'In the last 10 days, tested positive for COVID-19 in a PCR or TRAg test performed by a health professional - Do not follow the indication of the even.

1.10. User with symptoms and positive test, what to do?

If you have a cough or fever or dyspnea, or anosmia or ageusia, navigate the algorithm and act accordingly.

compliance. If none of these symptoms are present, transfer to 'Senior'.

1.11. User has already been triaged, and we indicated that we would send an SMS. for testing, but did not receive?

You must open the user's file and check the 'Meeting History' and follow the following instructions:

- There is no triage - Sort and act according to the guidance of the algorithm;
- Has complete prior screening and no worsening of symptoms – Transfer to "Triaging" and closing the meeting Others/ Transfer SNS24 - Triaging;
- There is screening carried out and worsening of symptoms - Triaging again and acting accordingly algorithm orientation.

1.12. How long does it take to receive the message sent by us? after the patient's assessment?

Minimum time for sending the SMS: About 12h.

1.13. Does the SMS with the lab test have validity?

Yes. The validity period for the prescription of the laboratory test for SARS-CoV-2 is 6 months.

1.14. The user has already been triaged and we indicated that we would send an SMS. with DPI data, but did not receive?

Inform the user that it can be sent up to 24 hours and if they have not received it by then.
time period, we should encourage the patient to proactively contact the health unit
registration.

1.15. Can I discharge the patient who has a negative test?

No. You will have to carry out the entire isolation indicated at the time of screening, unless have contrary indication from the health authority.

1.16. The Provisional Isolation Declaration includes the entire period of isolation?

The declaration issued by SNS 24 is valid for 7 days and counts the marked day as the start of isolation.

Example:

a. Start of isolation 01/10/2022;

b. End of isolation 01/16/2022;

c. Returns to normality on 01/17/2022.

Inform the user that the start date of the declaration is included in the DPI, so it should be added. 6 days the same.

1.17. Child's country, with symptoms and need for isolation in home, they want a declaration/certificate to stay at home taking care of son, for being a minor?

We should triage the child and follow the indications of the algorithm.

Family member added, you should contact the family doctor for certificates/statements. family assistance. For more information contact Social Security 300 502 502.

1.18 User has a landline or foreign phone number, receives the SMS to the test?

They must respond NO to the question 'Does it meet all these conditions? Mobile phone or telephone that' easily use (...) and comply with the referral provided in the algorithm = ADR-COMMUNITY.

1.19. User had symptoms in the last 24 hours, I can evaluate as symptomatic?

Yes, it should be classified as symptomatic.

1.20. User does not agree with the suggestions I am making. Can I change the same ones?

You cannot change the indications, as they are based on the correct answers you provided throughout the algorithm and must be fulfilled. The user must be informed/advised of them, having no obligation to comply if you do not agree.

1.21. User does not know their NISS but still wants the statement?

Without NISS, there is no issuance of a declaration by SNS 24, but you can always request it from health authority that will accompany you (family doctor or health delegate).

1.22. User wants help on how to visualize the DPI with the codes that Did you receive it?

If the user has already been evaluated by us and has the access codes to DPI, we can transfer it to the team. Administrative team. Alert that this team does not provide new codes or change data, just helps to log in. on the platform to view the DPI.

1.23 During the isolation, there will be some contact from the unit of health?

You will not be contacted; however, we should always alert the user that in case of the appearance of symptoms or doubts should contact SNS 24 again.

1.24. User with positive test for COVID-19 with a history of infection in the last 6 months?

You must open the user's file and follow the following instructions:

- If the user has symptoms for screening and the algorithm indicates 'Cancel' - Transfer for 'Senior' and closing meeting Others/ Transfer SNS24-Triage;
- No symptoms - Transfer to 'Screening' and close meeting Others/ Transfer SNS24 -Triage.

1.25. User wants to know information about the certificates (vaccination, recovery and testing)?

You should be instructed to contact the line 808 24 24 24 and select option 3. It is alerted that this team does not extract certificates for the user, it only helps with the steps to follow so that they can do it independently the user can extract their certificate.

1.26. User wants to know when they will be able to obtain the certificate. recovery?

To access the Recovery Certificate, the 11 days after the PCR or TRAg remain.

1.27. To enter or exit isolation, a recommendation is necessary health authority?

No. You will only have to follow the instructions after the screening, and the justification for isolation is given by DPI resulting from screening.

1.28. The user does not accept the continuation, as they no longer want our service. support. What do I do with the scheduling?

At the end of the screening, no follow-up call is scheduled. The patient must be informed and agree. with the follow-up call.

2. Usability of the Platform - Alerts

2.1. When should I create a new record?

Whenever you do not obtain a patient search result, you must click on 'Create Patient' and create it. new user.

Can I provide extra information beyond what is in the algorithm?

To improve service and promote the correct support to users, we remind you that your assessment must be EXCLUSIVELY guided by algorithm issues and must be answered in accordance.

They cannot transmit information that is not in the script or regarding other users and never they must make deductions about what the user is conveying.

The user is giving me 9 digits for the NISS, is that correct?

No. The NISS (Social Security Identification Number) consists of 11 numeric digits that can be found on the back of the citizen card in the center.
